Dennis McCully, West Kentucky
Representative

May 12, 2004

INTRODUCTION

This report includes a directory of the coal preparation plants and/or coal rail loading facilities currently located in Western Kentucky. The directory lists prep and rail facilities, operating companies, and detailed locational and operational information. Also, detailed coal rail siding information is shown for each facility having direct rail transportation service.

Six coal facilities in West Kentucky are preparation plants and rail loading facilities combined, and three facilities are coal rail loading only. Fourteen facilities are preparation plants only, with the raw run-of-mine coal being trucked or conveyed into the facility and washed coal being transported out of the facility by truck, or by a belt conveyor to a river terminal.

There is currently one synthetic fuel plant located in Western Kentucky, see page 7.
